## Upcoming Headers

## Additional Information

Server	This <a href="#">Server</a> header seems to advertise the software being run on the server but you can remove or change this value.
Content-Security-Policy-Report-Only	<a href="#">Content Security Policy Report Only</a> is used to test a Content Security Policy before making it live. The browser will report on actions that have been taken based on the policy. <a href="#">Analyse</a> this policy in more detail. You can sign up for a free account on <a href="#">Report URI</a> to collect reports all over on your site.
X-Frame-Options	<a href="#">X-Frame-Options</a> tells the browser whether you want to allow your site to be framed or not. By preventing a browser from framing you defend against attacks like clickjacking.
X-Content-Type-Options	<a href="#">X-Content-Type-Options</a> stops a browser from trying to MIME-sniff the content type and forces it to stick with the declared content-type. A valid value for this header is "X-Content-Type-Options: nosniff".
